

The proposed rulemaking regarding the mandatory recording of all broadcasts by stations would impose a huge burden on small market stations, ours included. This action would, in effect, penalize all stations (the vast majority of which have no complaints filed regarding material aired) because of a few stations, mostly in large markets, that air controversial or objectionable material. The investment needed to comply, as well as the time involved in archiving thousands of hours of audio, would place an unnecessary burden on small market stations. We hope you will take all of this into consideration before proceeding. Thank you.
